## LOCAL EMPLOYMENT DYNAMICS

Local Employment Dynamics (LED), a partnership between the Indiana Department of Workforce Development and the U.S. Census Bureau, provides innovative demographic employment information (Quarterly Workforce Indicators) for local decision-makers, economic development agencies, education and training institutions, and transportation agencies. The Quarterly Workforce Indicators (QWI) measure the performance of the local economy. Turnover, separations, new hires, and average new hire earnings by county, metropolitan area, and Workforce Investment area are among the data items on the web site. The web address is: <http://lehd.dsd.census.gov/led/>. Select QWI On-line under Quick Links.

**Labor Force Data** The Labor Force Data presented here is the most recent data available at the time this letter was prepared. The September 2006 data are preliminary data and September 2005 data are benchmarked data. Information for the United States, Indiana, and the counties that comprise Economic Growth Region 10 have been included.

As previously announced BLS had found errors in some of the employment inputs used in the sub-state estimates published earlier this year and decided to conduct a thorough review of all inputs. That review is now complete. The corrections to the data for January, February, and March 2005 had small to moderate impacts on employment and labor force levels and little impact on unemployment rates in most areas. The labor force, unemployment and unemployment rate data for 2004 presented in this release also reflects the corrections to the inputs.
